SENIOR SUPPLEMENTS

Preparing for a life insurance exam can be an extremely important part of the underwriting process. In addition, insurers require a "senior supplement" exam for applicants age 70 and older. There are different types of exams, but most of the questions and activities are similar.

The exam may be given in person by the paramed or medical doctor who is doing the regular physical exam. In other instances, the exam is completed with a phone interview by the insurance company or a contracted vendor of the insurance company. Phone interviews tend to be recorded. If you have a hearing problem, it is important to notify the examiner – you should be able to hear the questions clearly. The examiner will also make sure the phone connection is good, especially if you are using a cell phone.

WHAT TO EXPECT WHEN COMPLETING A SENIOR SUPPLEMENT

Most of the questions are very similar despite the type of exam that is being done. The most common types of questions include:

Orientation

Day of the week, date, client age, birthday, address, current U.S. president, and past president.

Daily Activities

Cleaning, laundry, meal preparation, shopping, handling of finances, mowing the lawn, driving, any falls sustained, and medication compliance. A sample question may be, "Could you recognize if there is a change in the appearance of the pills for an ongoing prescription when a new bottle of medication is opened and question it?"

Exercise

What type of exercise and how often do you exercise?

Delayed Word Recall

The examiner will say several words, usually 3 to 10, and will ask you to repeat as many as you can remember a few minutes later. Some carriers may want you to use the words in a sentence.

Math

Simple math questions may be asked. For example, "Start at the number 20 and continue to subtract 3 from 20 until you reach 0."

Mobility/Get up and Go

The examiner will time how long it takes for you to stand up, walk 10 feet, turn around, and sit down again. Some carriers also require you to stand up and sit down up to five times in a row.

Clock Draw

The examiner says a time, for example, 10 after 10, and you are asked to draw a clock with the hands pointing to the proper numbers.

BEST PRACTICE

Some may consider these questions "silly" or "ridiculous" without an understanding of the purpose of the questions and the potential impact of frivolous answers or less than full effort in completing the various tasks the examiner may ask you to perform. Make sure the responses given and activities perform represent your "best effort".
